

FANFARE

Reliable variety with excellent yield potential

Advantages:

- Excellent yield potential
- Early flower and early to medium maturity
- High protein yield

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long

FANFARE

Reliable variety with excellent yield potential

Growth:

Grain maturity	
Plant length	
Beginning of flowering	

Resistance:

Lodging resistance	
Botrytis	

Yield & Quality:

Yield potential	
Protein content	
Protein yield	
Thousand grain weight	
Tannin content	

Cultivation:

Sowing depth	Heavy soil: 6-8 cm, light soil 8-10 cm
Plant density	35-50 plants per m2. The best possible row distance is 25-45 cm depending on the sowing method.
Sowing time	Depending on climatic and soil conditions, beginning at the end of February.
