

KWS KINETIC

Winter Wheat

KWS Silverstone x Reflection

SEEDING
THE FUTURE
SINCE 1856

The highest yielding candidate for 2019/20

- Highest yielding Group 4 candidate
- Excellent specific weight and very stiff straw
- Great all-round disease package including resistance to OWBM

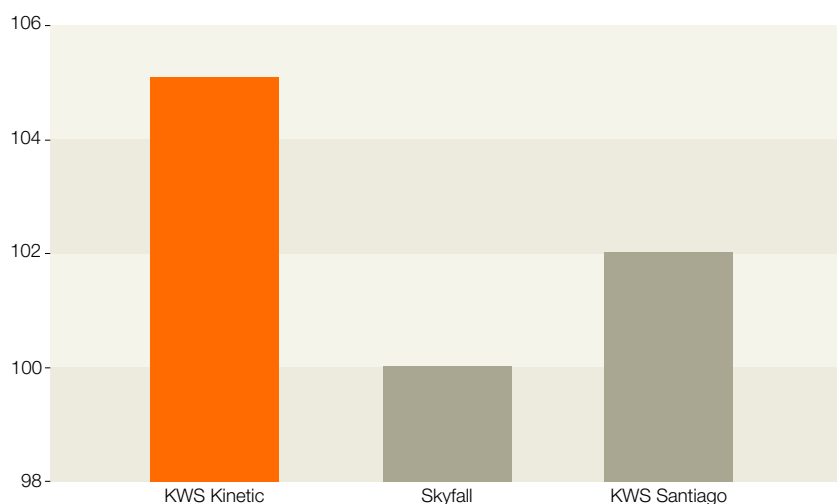

KWS Kinetic is the highest yielding Group 4 candidate for 2019/20. Over the past two years it has given a 3% yield advantage over the control variety, KWS Santiago. This, coupled with a high untreated yield and a number of important characteristics, makes KWS Kinetic a very exciting new variety for farmers.

KWS Kinetic has a good disease package, including 6s across the board and the added benefit of OWBM resistance. It's a variety that stands well in the field due to its very stiff straw.

With an outstanding specific weight of 78.8 kg/hl and the right balance of protein and HFN, KWS Kinetic is able to fulfil the high volume feed market requirements successfully.

KWS Kinetic	
Yield (% treated controls)	
UK treated	105
UK untreated	86
Disease	
Mildew	6
Yellow Rust	6
Brown Rust	6
S.tritici	6
