

LG FLYNN

WINTER BARLEY

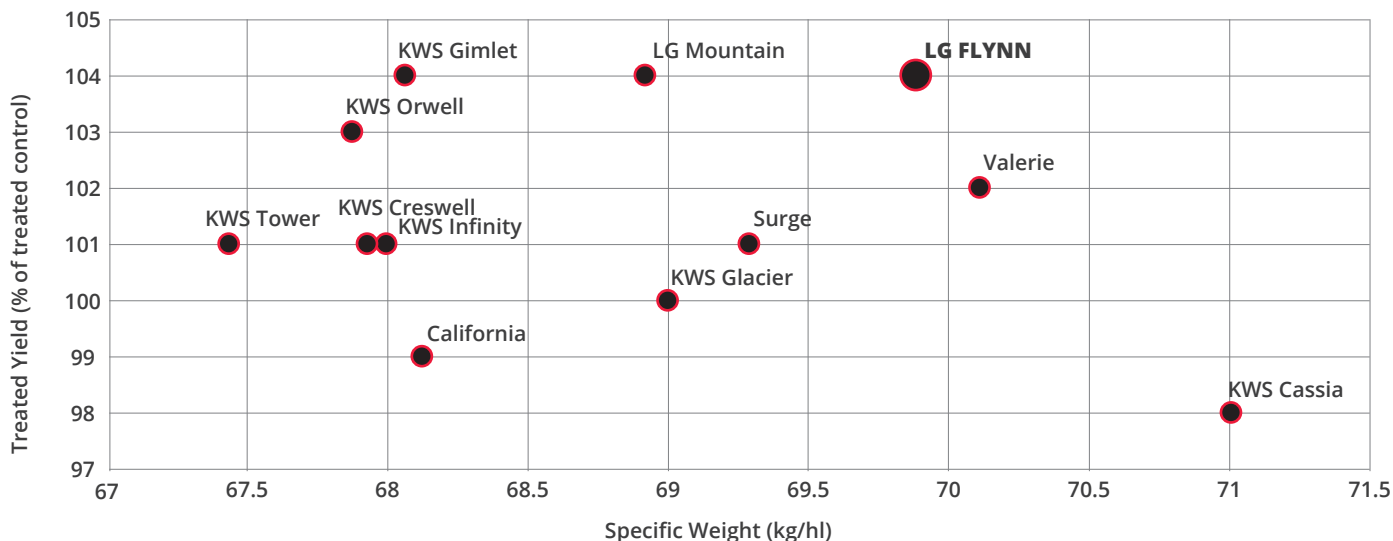

Pedigree: Captain x KWS Tower

Breeder's Reference: LGBU13 6446 B

Trial Status 2019/20: AHDB Recommended

LG Flynn offers one of the best specific weights on the AHDB Recommended List 2019/20, with screenings similar to KWS Cassia. Its high yield potential, solid agronomic characteristics and very good grain quality help ensure good performance on-farm.

UK YIELD POTENTIAL:

LG Flynn performs well in both treated and untreated trials, producing consistently high yields.

LG Flynn has one of the best specific weights available on the AHDB Recommended List 2019/20.

AGRONOMIC CHARACTERISTICS:

	LG FLYNN	KWS Orwell	Surge	KWS Cassia
Resistance to lodging	7	8	7	8
Straw height without PGR (cm)	95	87	88	91
Straw height with PGR (cm)	91	85	85	89
Ripening (+/-KWS Orwell -ve = earlier)	+1	0	0	+1
Mildew	4	3	6	4
Brown Rust	7	7	7	7
<i>Rhynchosporium</i>	6	6	7	5
Net Blotch	6	5	7	5
Grain Quality:				
Specific Weight (kg/hl)	69.8	67.8	69.3	71.0

LG Flynn is a taller strawed variety but has very good lodging resistance.

LG Flynn offers a strong disease resistance package with a 7 for both *Rhynchosporium* and Net Blotch.

LG Flynn carries resistance for Barley Yellow Mosaic Virus (BaYMV).

May 2019. Data from the AHDB Recommended List 2019/20. On the 1-9 scales, high figures indicate that a variety shows the character to a high degree.
