

KWS Fido

WINTER TRITICALE

KWS Fido remains the leading UK triticale variety. It is high yielding with taller, but very stiff straw. KWS Fido is early to ripen and has a superb specific weight. The excellent performance and superb agronomics make KWS Fido the perfect choice for the second cereal slot on farm.

The performance of triticale in a second cereal situation has for many years been underestimated. Interest is now increasing on farm in this flexible, high yielding crop. Trial yields are up at 10 t/ha and second cereal yields on farm can compare favourably with other crops, including wheat.

A principle market for triticale is for grain and for on farm feeding. Triticale has a new expanding market in anaerobic digestion, where its low costs, ease of management and dry matter yields are proving attractive. Senova's leading varieties are proving popular for AD plants.

Triticale is also well suited for bioethanol production, with its inherently high fermentable carbohydrates and soluble proteins. In addition, triticale is very productive in NVZs and under lower input systems.

- Leading UK variety
- Stiff, taller straw
- Early to ripen
- Excellent specific weight

GRAIN QUALITY

Specific weight (kg/hl)	77.0
Protein content %	11.8

AGRONOMICS

Lodging %	[0]
Straw length (cm)	111
Ripening (days ± Agostino)	[0]

DISEASE RESISTANCE

Yellow rust*	6
