

# ONE OF THE HIGHEST YIELDING GROUP 4 WHEATS.

*Grow to expect the best*

## RGT SAKI

### G4 WINTER WHEAT

TYPE:  
**GROUP 4**

SPECIES:  
**WINTER WHEAT**

END MARKET:  
**FEED**

#### **CHARACTERISTICS:**

- > No compromise on yield or security.
- > One of the highest yielding varieties in 2020.
- > Unique combination of treated and untreated yield.
- > Outstanding disease resistance.
- > Short, with good straw strength (7 and 7).
- > Juvenile resistance to yellow rust.
- > Exceptionally high yields whether drilled early or late.

This very high yielding Group 4 variety exhibits excellent disease resistance. It is unique in featuring outstanding treated/untreated yield combination, something that has defied plant breeders until now. This, together with OWBM resistance, relatively short straw and good grain quality helps RGT Saki deliver consistent performances across all UK regions, rotational slots and soil types, regardless of whether it is early or later drilled. It was the highest yielding RL wheat in 2020.

RGT Saki.  
Recommended  
List 2021/22.
