

LG Typhoon

High yielding hard feed wheat, with a very good disease resistance profile

Nabim Group: Group 4

Market Options: Feed

OWBM Resistance: Yes

Sowing Date: Early

Rotational Position: Second Cereal

LG Typhoon is a high yielding hard feed wheat, with a very good disease resistance profile, OWBM resistance and broad adaptability for on farm positioning.

It has one of the highest Septoria resistance scores available, at 7.2.

Strengths

- One of the highest Septoria resistance scores available
- Moderately tall strawed variety, with good straw strength
- Exhibits characteristics for the earlier drilling scenario
- Excellent Yellow Rust combined with OWBM resistance
- High yield potential, with good stable consistency across regions
