

— FACT SHEET

Eagle Winter Oat Factsheet

*The high yielding winter oat that
doesn't compromise on quality*

- High treated and untreated yields
- Milling quality
- High disease resistance profile
- Very early to mature

Eagle winter oat is UK National Listed and was bred by Edelhoff from Austria. Samples have been seen by major end users and buy back contracts are available.

Eagle is an early maturing variety which was proven in Official trials in Scotland, where the variety was 6 days earlier to mature than Mascani.

	Treated Yield (%)	Untreated Yeild (%)	Lodging 1 = Good 9 = Poor	Maturity 1 = Late 9 = Early	Mildew (1-9)
EAGLE (Agrii Trials 2018)	113.4	113.9	1	6	5
Mascani	103.8	105.8	1	5	5
Dalguise RGT	112	104.6	1	5	6
Gerald	106	107.9	1	4	4

If you are interested in growing winter oats this year, we would be pleased to talk to you. We have both standard milling oat and premium gluten free contracts we are looking to place.

"Straightforward and easy...they are remarkably resilient and a great crop to grow"

"It covers the ground quickly, we planted late and it just bounced out the ground and it looks magnificent"

"When asked to grow the crop I said no twice due to historic impressions, but I really enjoyed growing this crop, it's been stress free, looks like its going to be a reasonable yield and I'm seriously considering growing winter oats again"

Colin Chappel,
Lincolnshire Farmer
