# **CANYON** Yellow hulled

Medium early yellow oat with best mildew resistance

### **Advantages:**

- Medium early yellow oat with best mildew resistance
- Above average tolerance against BYDV
- Bold kernels and an above average hectolitre weight
- The good grain quality of CANYON makes it suitable for a range of end markets including milling for human consumption and animal feed

#### **Cultivation:**

Compensates difficult cultivation conditions and high pressure of mildew. Fits all loctions with appropriate drilling times. Well closed PGR enhances straw stiffness.

### **Short profile:**

	= very low resistance/early/short,	++++ = very high resistance/late/long
Straw maturity	delayed	
Lodging resistance		
Mildew		
Quality		
Grading (> 2,0 mm)		
Hectolitre weight		

Breeder: Nordsaat Saatzucht GmbH, Germany Version: 16.02.2016 / 3.00

# **CANYON** Yellow hulled

Medium early yellow oat with best mildew resistance

Plant development and vitality:		
Maturity		
Straw maturity	delayed	
Yield structure:		
Panicles/m <sup>2</sup>		
Grains/panicle		
TGW		
Sowing:		
Time of sowing	end of February until middle of April	
Seed rate	locally adapted	
Straw:		
Plant height	medium to tall	
Lodging resistance		
Stem brackling resistance		
Disease resistance:		
Mildew		
Crown rust		
Leaf spots		
Septoria		
Plant protection:		
Fungicides	profitable under very high disease	
Insecticides	follow official recommendation	
Quality:		
Grading (> 2,0 mm)		
Hectolitre weight		

Breeder: Nordsaat Saatzucht GmbH, Germany Version: 16.02.2016 / 3.00
